

Fixed Mounting Bracket Installation Guide

1. Secure two brackets at the bottom of the desired mounting location as shown. Note, slotted side of bracket goes on wall to aid in leveling.

Screws are only provided for shutters. YOU must supply appropriate exterior side screws

2. Measure height of shutter or simply place shutter on bottom brackets to establish position of top bracket.

3. Secure top brackets

Screw are only provided for shutters. YOU must supply appropriate exterior side screws

4. Place shutter on brackets and secure with supplied screws
